GENERAL OVERVIEW EN

At Peter's Cooling, we combine energy efficiency, durability, and customization to set new standards in the commercial and industrial refrigeration industry.

Our European research and development team drives innovation, ensuring lower costs and high performance for every project. We are recognized for the professionalism of our service team and excellence in after-sales management, giving our clients the confidence that their investments are protected long term through fast, dedicated support.

With over 1,800 equipment models in our portfolio many available directly from stock together with national and international coverage and a continually expanding client network, we are ready to meet all your needs, no matter the size of your business.

HUNDREDS OF GROCERY STORES, SUPERMARKETS, AND RESTAURANTS EQUIPPED WITH OUR SOLUTIONS TRUST US.

Peters Cooling was born out of a real need. As owners of supermarket chains in Europe, we experienced first-hand the ongoing challenges related to the performance of commercial refrigerated display cases and freezers. This experience inspired us to set up our own production facility, developing solutions tailored to the most demanding requirements.

Being both end users and manufacturers gives us a unique perspective on market needs, enabling us to design equipment that not only meets but exceeds customer expectations. Over the years, we have expanded our production capacity, and through strategic partnerships and acquisitions we now offer a level of flexibility and versatility that is hard to match.

Our product range includes refrigerated and freezer display cases, cold rooms, energy-efficient refrigerated containers, metal shelving, checkout counters, as well as 3D projects created with our architects—serving everything from small shops to supermarkets and modern commercial spaces. Through continuous investment in research and development, our European R&D team integrates the most advanced refrigeration technologies, with a strong focus on innovation and sustainability.

With a strong and steadily expanding presence in Europe and the Middle East, we provide customized solutions and professional after-sales support through dedicated sales and service teams. Strategic partnerships, expanded production capacity, and a commitment to flexibility make us one of the most trusted partners for any refrigeration requirement.

At Peters Cooling, we value customer-focused innovation, sustainability, and excellence in performance. Looking to the future, we remain committed to expanding our global footprint and developing innovative technologies that meet the ever-evolving needs of the refrigeration industry.

CONTROL AND MONITORING SYSTEM

Advanced Control & Monitoring System – Integrated into Peter's Cooling Complete Projects

Enhance the performance of your professional refrigeration equipment with the Peter's Cooling Intelligent Control & Monitoring System, a next-generation IoT platform designed for efficient, safe, and fully automated operation.

IoT Technology for Centralized Management

- Wi-Fi connectivity for easy installation, no additional cabling required
- Intuitive mobile interface for full equipment control via smartphone or tablet

Key Features

- Full control of temperature and operational parameters
- Real-time monitoring 24/7
- Automated alerts for temperature deviations and equipment faults
- Integrated HACCP temperature logging with automatic graphing and historical records

Technical & Operational Benefits

- Reduced energy consumption through optimized operating cycles
- Centralized control of multiple units from one interface
- Predictive monitoring and rapid reaction to irregularities

Application Areas

- Supermarkets and grocery retail
- Restaurants and HoReCa operations
- Cold storage warehouses and logistics centers
- Industrial applications requiring precise temperature control

Availability

- Offered exclusively with Peter's Cooling refrigeration equipment
- Not available for standalone purchase
- Reduced pricing available for compact refrigeration units
